

HOW SHOULD I TREAT?": CARDIOGENIC SHOCK

How did I treat

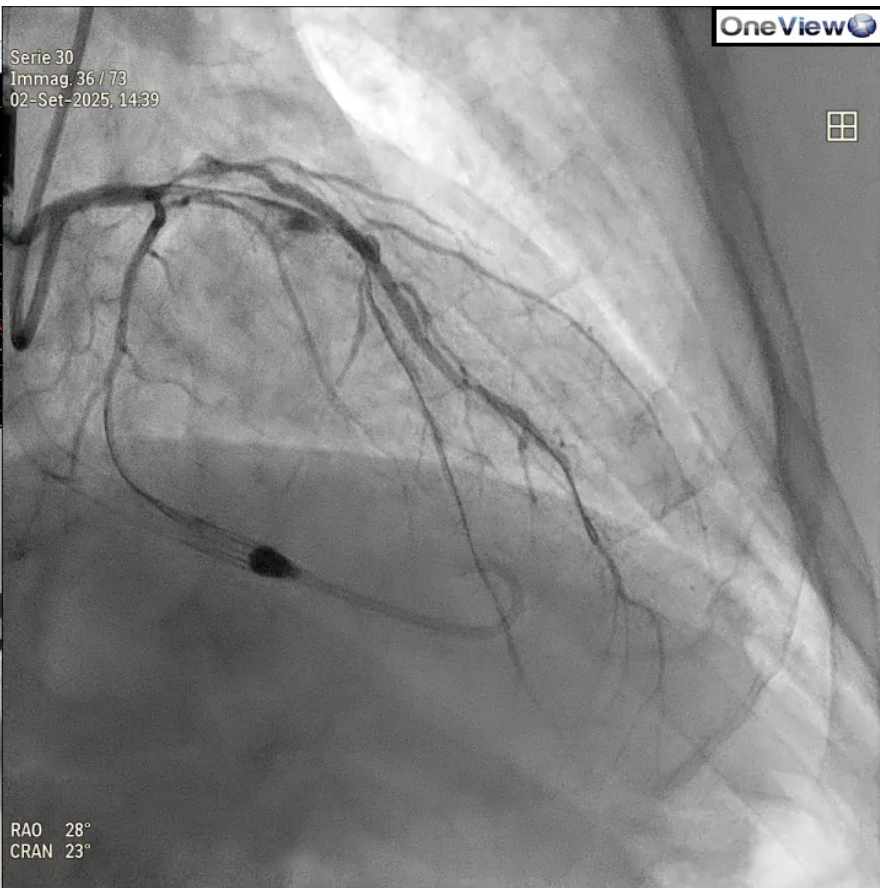

Cristina Aurigemma
Fondazione Policlinico Universitario A. Gemelli IRCCS Roma

Norepinephrine
Dopamine
&
Urgent coronary angiography

**WHAT
WOULD
YOU DO?**

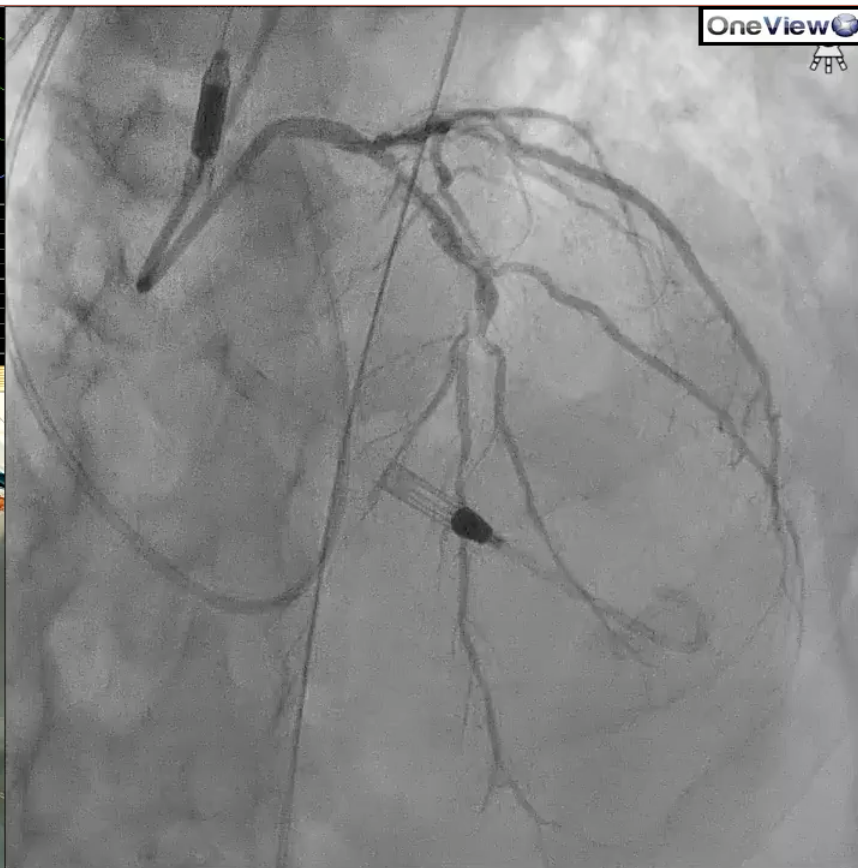

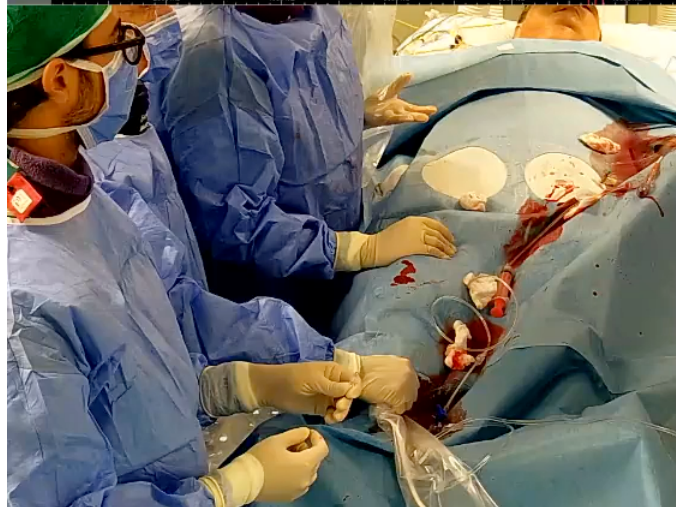

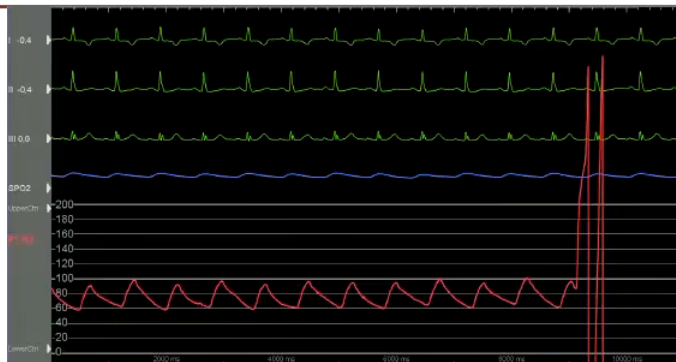

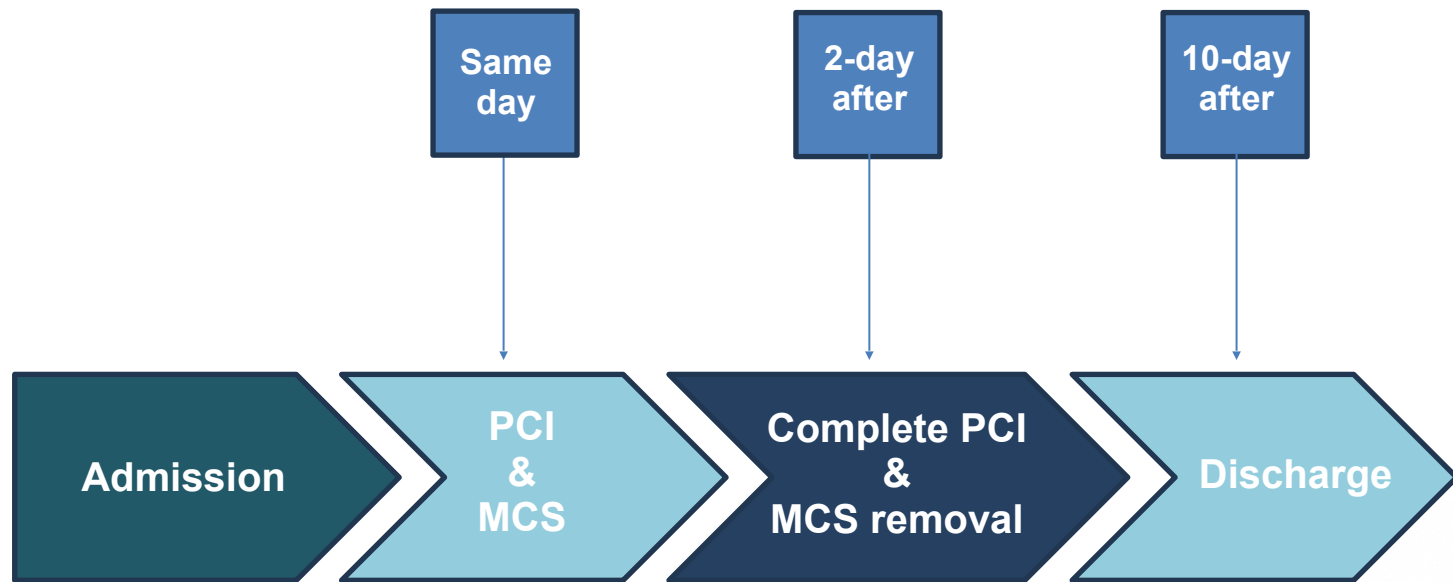

What to do?

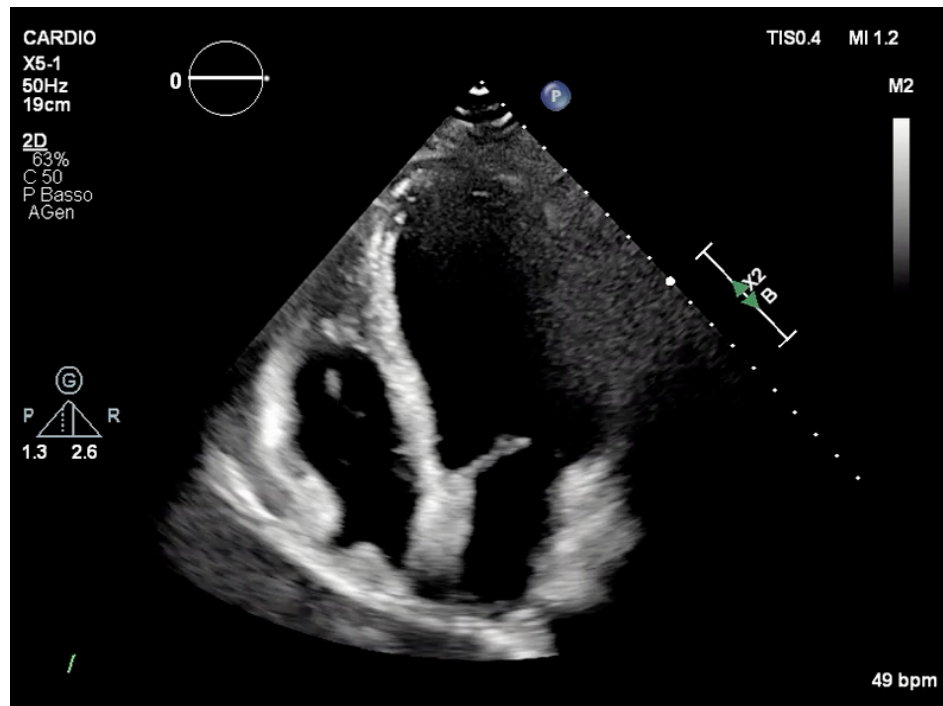

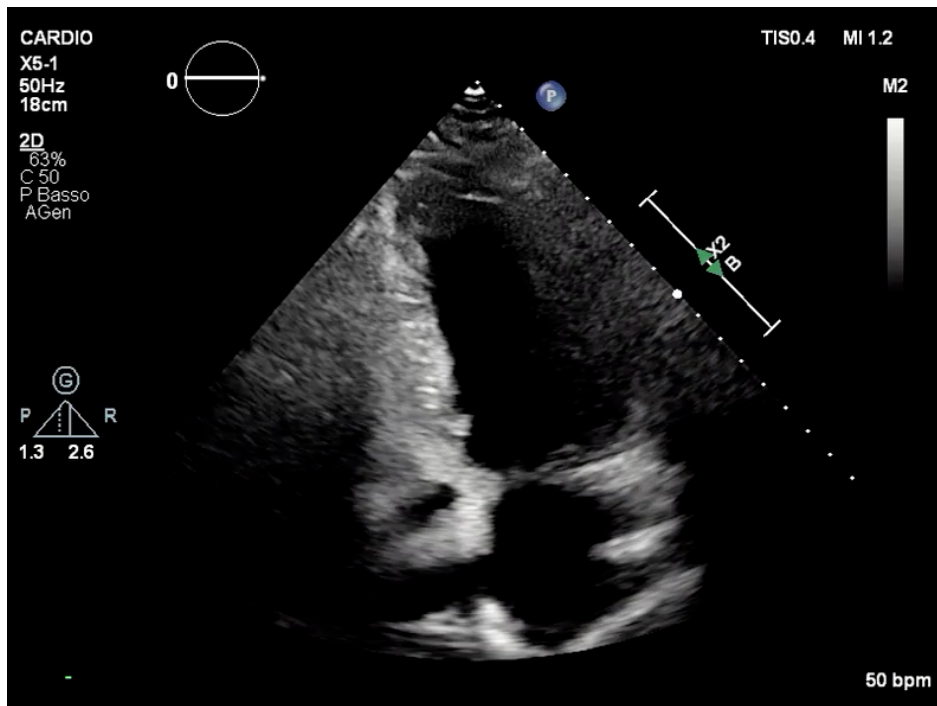

- ✓ To continue the PCI
- ✓ To reevaluate after two days of unloading and therapy
- ✓ To call the cardiac surgeon

At 3-month follow-up, the patient was asymptomatic for angina and dyspnea, with improvement of left ventricular systolic function

Thank you for your attention
